Engineers today are under immense pressure from their organization to deliver value at an unprecedented pace. Apart from that, challenges like the shrinking decision cycle and the growing volume of information leads to increasing difficulty in finding the right solution. **The cost of a wrong decision has never been higher.**

Companies have spent millions of dollars on information management tools, but these investments have done little to drive engineering processes' improvements.

Join us at this workshop to find out how our semantic search tool can help locate potential solutions to your engineering problems and produce innovative ideas, while leveraging on internal corporate knowledge.

In addition, you can also ensure that your innovative ideas are in trend too!

Agenda

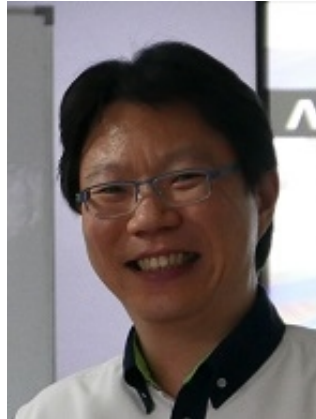

Time	Agenda
09.00 am - 09.30 am	Registration
09.30 am - 10.00 am	Key features of IHS products
10.00 am - 11.00 am	Guided workshop for information searching and knowledge discovery
11.00 am - 12.00 pm	Free trial session

Presenters' Profile

Nitin brings with him over 4 years of professional experience in the Oil & Gas sector, specializing in Design Engineering, Process Improvement and Project Management. He has worked with Oil & Gas giants across the world and spearheaded efforts to design, revamp and optimize their refinery processes. His global exposure, customer focus, team handling capability and versatility complement his sharp quantitative skills and passion for problem solving. While continuously delivering results, he has also donned the hats of a mentor to new hires and of a Quality Coordinator, responsible for continuous improvement of Engineering Operations.

Nitin joined CAD IT in the beginning of this year and is also pursuing his MBA from Nanyang Business School.

Timothy Kwan, GM of CAD-IT Consultants Malaysia, holds a Graduate Certificate of Engineering Management from Queensland University of Technology, Australia and a Graduate Diploma in Electronics and Electrical Engineering from Kolej Damansara Utama.

He joined CAD-IT Consultants (M) Sdn Bhd in 1996 and is responsible for overseeing the Malaysian operations as well as product management of CAD-IT solutions in SEA. He has received training in a range of simulation and PLM software, of which ANSYS is key. He has successfully trained many customers including UTP, IIUM, USM, AMD, Carsem, Fairchild, Infineon and Intel.
