

# Workshop on Engineering at the Speed of Thought

**26th Oct 2017 | 9:30 am - 12:30 pm**

CAD-IT Consultants (M) Sdn Bhd,  
607 Block A, Kelana Centre Point, No 3, Jalan SS 7/19  
Kelana Jaya, 47301 Petaling Jaya, Selangor

Simulation software provides invaluable engineering insights before testing prototypes. But don't you wish it were easier to learn and master, and that you'd get results faster?

Now you can, with the new **ANSYS Discovery Live**.

**ANSYS Discovery Live** provides the speed of instantaneous simulation results plus unprecedented flexibility that enables more engineers to benefit from its use. This revolutionary software enables true simulation-driven product development and is a much better fit for early concept design.

- Experiment with design ideas, easily make changes and receive instantaneous engineering insights
- Perform 10 to 1,000 simulations in the same timeframe that was once needed to perform just one simple simulation
- Simulate on newly created models or any imported CAD file
- Investigate more options earlier in the design process and develop new products that get to market faster
- Explore all your "what if" design ideas at little to no cost in time and

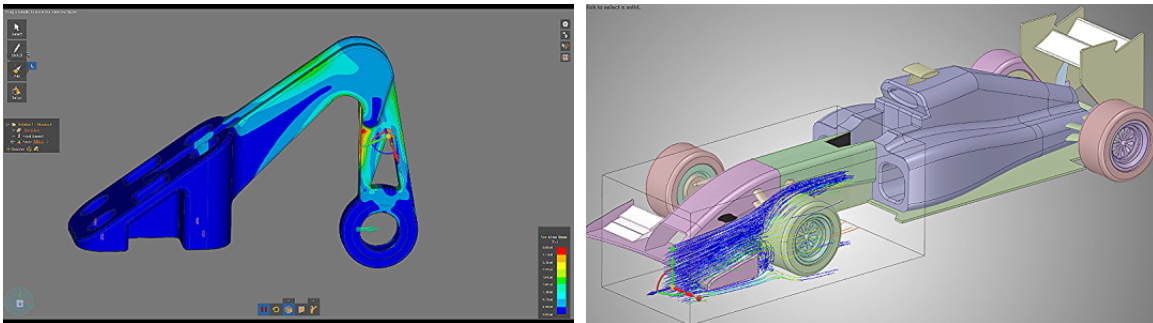

effort

- Facilitate breakthroughs and innovations and take your engineering efforts to the next level

**Discovery Live is easy to use.**

Register now for this **FREE** workshop and **experience it first hand!**

## Presenters' Profile

**Muhamad Norfazli Bin Muhamad Amin** is an Applications Engineer at CAD-IT Consultants (M) Sdn Bhd. He graduated from Carleton University, Canada with a degree in Mechanical Engineering. He has used ANSYS while at University, to design and simulate his University's Shell Eco-Marathon car.

He has worked as a Technical Officer for the F1 in School Technology Challenge Competition, (Regional and Finals) prior to joining CAD-IT. Fazli now provides technical support for ANSYS CFD solutions.
