### **Setting a new course in the Shipbuilding Industry with CAD-IT Consultants**

Across the shipbuilding industry, global demand for ships is at an all-time high. Increasing wealth, world travel and a growing retiree population have made vacation cruises, nautical sports and boat rental more popular than ever.

Demand for commercial and work ships that deliver goods, lay communication cables, ferry passengers, ship supply vessels offshore, harvest fish and keep the shipping lanes free of ice is on the rise.

Shipbuilders must confront these challenges with new business strategies. To successfully manage this transformation, progressive shipyards and engineering companies must combine innovative practices and advanced product lifecycle management (PLM) technologies to streamline engineering-through-production processes. Whether they build aircraft carriers, submarines, cruise ships, tankers, yachts, workboats or ship components, companies will need software tools to simulate, organize, design and control their industrial processes.

**Commercial Ships**  
Project Management and Collaboration across multiple teams are essential in new generation Commercial shipbuilding.

## ENOVIA - The collaborative innovation application

Innovation increasingly means global teams collaborating with global information in a social context – and doing so with clarity, confidence and consistency. Powered by the **3DEXPERIENCE Platform™**, ENOVIA enables your innovators to benefit from the true rewards of collaboration. Easy to acquire, quick to learn and effortless to master, ENOVIA is reliable and robust enough to manage even the most sensitive and mission-critical data.

Fully integrated with design, engineering and analysis solutions from Dassault Systèmes, and other software vendors, ENOVIA's intuitive user interface delivers powerful capabilities via a standard web browser. ENOVIA has proven and ready-to-use business processes, so you can rapidly benefit from the true rewards of effective collaboration.

ENOVIA is committed to providing [products](#) and [solutions](#) for individuals at organizations of all sizes – from small businesses to the largest global enterprises – to participate in effective and rewarding collaborative innovation.

## What our customers say

*PLM can simulate operating conditions, thereby enhancing quality and improving lifetime operation cost savings.*

**Brian Chang, CEO**, Yantai Raffles Shipyard

*Our previous modeling solution lacked the ability to manage a complete model required for efficient marine design, which was one of the reasons why we chose to manage the entire project with the DS PLM Solutions.*

**William Pegram**, Managing Director, Isonaval

*ENOVIA enables STX Shipbuilding to accelerate product innovation aimed at achieving top line revenue growth and improving bottom line profitability .*

**Sang Byung Shin**, Innovation Team Manager, STX Shipbuilding

## About CAD-IT Consultants (Asia) Pte Ltd

CAD-IT Consultants, formed in 1991 in Singapore, is a global ISO 9001:2008 certified premier product lifecycle management technology solution provider providing affordable, state-of-the-art world class turnkey solutions covering software, consulting, training, support and maintenance services to meet design, engineering, manufacturing and enterprise management needs.

CAD-IT had received 70 International and National Awards since 1991 in recognition of its professionalism in training, service and support of its customers. CAD-IT Consultants currently has 10 offices spread across Singapore, China, Hong Kong, Malaysia, United Kingdom and Thailand.

Since February 2010, CAD-IT has partnered the Singapore Workforce Development Agency (WDA) to offer Advanced Certificate courses in PLM and Engineering Simulation, under the Workforce Skills Qualifications (WSQ) framework, with the charter to upgrade the technological capabilities of organizations in Singapore so as to enable them to undertake high value-add design, engineering, manufacturing and R&D activities.
