Attention : Ms Florence Tan  
Director, Marketing

Dear Florence,

Re : Letter of Commendation

I will like to express my gratitude & satisfaction with the services and help offered to us by Dr. Mou Jianqiang when I used ANSYS. We presented successfully the paper "Effects of Piezocomposite Coating on Sound Radiation and Scattering by a Submerged Cylindrical Structure" at 70<sup>th</sup> Shock and Vibration Symposium using ANSYS. We also find the ANSYS/Multiphysics is a useful FEA tool for piezoelectric analysis.

I hope that CAD-IT will continue to extend your prompt service and support to us in the forth coming year.

Thanks & Regards
